COSMO PEEL
TREATMENT

Cosmo Peel Treatment

SUPERFICIAL & MEDIUM
CHEMICAL PEEL SYSTEM

For wrinkles, texture, smoker's
complexion and pigment disorders

KEY BENEFITS:

- Reduces signs of skin aging
- Improves skin texture and smoothness
- Reduces acne and pigment spots
- Available in 4 concentrations:
12%, 15% - superficial peel
18%, 20% - medium peel

ACTIVE INGREDIENTS:

Foamer 15 – Glycolic Acid, Enoxolone - pH 4.1

TCA – pH 0.5

Cosmo Peel Cream – Lactic, Salicylic, Citric, Ascorbic Acids, Retinyl Palmitate - pH 4.8

WHY CHOOSE COSMO PEEL

- 4 concentrations of epidermal-dermal stimulation
- Safe and controlled penetration via buffered TCA
- Cosmo Peel Cream: enhances and prolongs TCA action, counteracts inflammation
- Minimal social downtime
- Aesthetic treatment enhancer: mesotherapy, Botox, fillers

Lifts skin's appearance.

WHY COSMO PEEL CREAM?

- Avoids complications
- Reduces inflammation
- Enhances the action of the TCA
- Brings immediate comfort: calming, soothing
- Faster recovery of the skin
- Improved skin regeneration

The patient keeps the cream on for 12 hrs then rinses off with water.

STANDARD PROTOCOL

- Cleanse the face using 4 pumps of Foamer 15, rinse and dry
- Pour 1.5 ml of TCA (equivalent to 20 drops) into a cup and apply to the face using 2 cotton buds held together.
- Apply zone by zone. Apply with vertical and horizontal strokes across all areas
- Ventilate and allow to dry in between layers. Do not rinse. Apply a total of 2 layers
- Apply 4 pumps of Cosmo Peel Cream and massage thoroughly with gloved fingers. The patient goes home with the Cosmo Peel Cream on and rinses it off with water after approximately 12 hours

3 APPROACHES

- Light approach: Cosmo Peel TCA 15% protocol for a light peel frosting level 1 phototypes 3-6 and sensitive skin
 - 4 sessions at 14 days interval
- Medium approach: Cosmo Peel TCA 18% protocol for a strong peel with white frosting phototypes 1-3 ONLY
 - 2 sessions at 8 weeks interval
- Global approach: Cosmo Peel TCA 15% combined with pinpoint 18% frosting on lentigo - phototypes 1-3, face, neckline and hands
 - 2 sessions at 14 days interval
